TO: Raymond C Tait, Vice President for Research, Fusz Hall
second floor, campus mail
FROM: William S Stark
DATE: September 12, 2011
SUBJECT: Report on President's Research Fund (PRF) seed grant
"Visual receptor cells as a model system to understand how
cells target gene products to the correct locations"

The purpose of this memo is to fulfill the requirement (Guidelines 9/09) for:

- (1) a one-page technical report (attached)
 - (2) a summary of expenditures (4 page attachment)
- and
- (3) an annual report that documents any funding, publications, or presentations directly related to this support (2 page attachment)

I want to commend Ms Cynthia (Cyn) Wise, Biology's Grants Development Specialist, for helping me to navigate the financial aspect of SLU's complicated infrastructure for research.
